The shelter says that they have more people staying there so they need \$100,000.00 to help with the overflow. That is crazy , they did hire someone to monitor the overflow at various churches that pays \$50.00 a night. The places do not charge them for the use of their facilities. If they say they need the money to feed them, that 's another crazy thing because they receive food from groups just like at LINK. I know this because I run LINK and some of our groups serve them dinner. All the dinners are donated at no cost to the shelter. I believe the money could be used somewhere else in the community. Hard times have hit all of us and I think it's time the shelter realizes that. The city already gives them some money and I believe that is great, but it needs to stop somewhere. Please share my concerns with the rest of the commissioners. Thank You

Gregory Moore
