

50-Year Vision for Kansas Water

Thursday, April 24 | 4:30 - 6 p.m.

Kansas Union, Kansas Room | University of Kansas, Lawrence

Vision Team representatives from the Kansas Water Office, Kansas Department of Agriculture, and Kansas Water Authority are seeking input from campus and community stakeholders. Feedback from KU faculty, staff, students and the public will help inform a major statewide Vision to be submitted later in 2014. Brownie Wilson (Kansas Geological Survey) and Jerry deNoyelles (Ecology & Evolutionary Biology and Kansas Biological Survey) will make brief presentations on the status of the Ogallala Aquifer and reservoirs in Kansas. Tracy Streeter, director of the Kansas Water Office, joined by Jackie McClaskey, secretary of the Kansas Department of Agriculture, will outline the objectives of the Vision project and respond to questions.

This event is hosted at KU by the Office of Research and the KU Water Research Community. Refreshments will be served. For more information, and to RSVP, email KURES@KU.edu or call Tricia Bergman at (785) 864-3303.
