

EROSION AND SEDIMENT CONTROL PLAN (ESCP) EXAMPLE

What To Include in Your Erosion and Sediment Control Plan:

- Compass orientation of site
- Approximate site elevations and curb elevation
- Direction arrows of typical drainage
- Any adjacent waterways or stormwater channels
- Location of existing sidewalks
- Location of posted permit(s) and ESCP
- Location of all affected stormwater inlets
- Location of stabilized construction site entrance
- Location of all stormwater control measures to be used on site (i.e., perimeter controls, inlet protection, etc.)
- Location of stockpile(s)
- Location of designated washout containment area with signage
- Location of chemical toilet(s)
- Location of solid waste container(s)
- Location of any fuel or chemical storage
